Skills

- C# | .NET | Node | Express | Nest | Typescript | PHP | Rust | React | Next | Angular | JavaScript | SQL | Git | MongoDB | PostgreSQL
- NoSql | Cloud Computing | Unit Testing | Azure | Jira | AWS | CI/CD | Docker | Unity | Game Development
- Microservices | Distributed Systems | Frontend | Backend | Full-Stack | English - Advanced Level , Portuguese - Fluent

Experience

Full Stack Development

Jet E-Commerce

Ribeirão Preto, SP, BR

06/2022 - 03/2024

- Participated in the end-to-end deployment and creation of features for an E-Commerce system, from understanding and defining the layout and requirements to implementation, using **Angular**, and software deployment.
- Led the development of new partner integrations for payment and product delivery on the platform.
- Was responsible for migrating **60%** of the legacy system (**ASP.NET**) to new technologies like Node.js and Angular.
- Designed and implemented scalable APIs using microservices architecture in a **Docker** environment to handle payment execution, freight/discount calculation, and product search using **C#, .NET, Node.js, Typescript, Azure, MongoDB, and SQL**.

Full Stack Development, Intern

Construsite Brasil

Belo Horizonte, MG, BR

05/2021 - 06/2022

- Was responsible for designing and implementing scalable REST APIs and layouts in a **Docker** environment, using **PHP, React, Next, jQuery, and TypeScript**, aimed at meeting the demands of the company's E-Commerce products, customized websites, and landing pages.
- Conducted training sessions for the internal team, covering the principles and best practices of the technologies used in the company. Additionally, I led the onboarding process for new team members, ensuring their effective adaptation to the team.
- Supervised the monitoring of the company's products and allocated identified bugs to the responsible team, resulting in an increase in project quality.
- Participated in the continuous integration of products, including code submission, approval, and review.

Education

Bachelor of Science

PUC MINAS

Belo Horizonte, MG, BR

02/2022 - 02/2025

- Major in System Information

Technical Course

CEFET

Contagem, MG, BR

02/2018 - 03/2021

- Technical in Science Computer

Projects

- Native's War: Creator of a "Tower Defense" game about the history of Brazilian natives during the colonial period (Unity, C#). Link to the [Project \(01/2020\)](#)
- Festival Party: Designed and implemented a rental clothing management and monitoring software (Express, Next, AWS, Node). Link to the [Project \(04/2023\)](#)

Courses and Certificates

- **Red Hat System Administration I:** Course that implements concepts on operating systems, commands, and application management on Linux. (08/2023 - 11/2023)
